

Review pricing for Text-to-Speech

Text-to-Speech is priced based on the number of characters sent to the service to be synthesized into audio **each month**. You must enable billing to use Text-to-Speech, and will be automatically charged if your usage exceeds the number of free characters allowed per month. For information about how to keep track of your character totals, see [Monitoring API usage](#). Price is calculated per character.

The total number of characters in the input string are counted for billing purposes, including spaces and newline characters. All [Speech Synthesis Markup Language \(SSML\)](#) tags (except the [<mark>](#) tag) are also included in the character count.

Pricing table

Gemini-TTS

The latest evolution of our Text-to-Speech technology giving granular control over generated audio using text-based prompts.

Model	Free usage limit	Price after free usage limit is reached
		Input tokens: \$0.50 per 1 million text tokens*
Gemini 2.5 Flash TTS		(sku: 242A-EA16-C1EC)
Gemini 2.5 Flash-Lite Preview TTS	Not available	Output tokens: \$10.00 per 1 million audio tokens*
		(sku: 9228-79EF-B162)
		Input tokens: \$1.00 per 1 million text tokens*
		(sku: EB3F-1051-05D7)
Gemini 3.1 Flash TTS (Preview)	Not available	Output tokens: \$20.00 per 1 million audio tokens*
		(sku: 7976-330B-8F17)
		Input tokens: \$1.00 per 1 million text tokens*
		(sku: 8FF1-7E5B-5BB7)
Gemini 2.5 Pro TTS	Not available	Output tokens: \$20.00 per 1 million audio tokens*
		(sku: DCF3-CB17-8262)

* Audio tokens correspond to 25 tokens per second of audio

Latest TTS models

Powered by our cutting-edge LLMs, our latest TTS models deliver an unparalleled level of realism and emotional resonance right out-of-the-box for every use-case.

Model	Free usage limit	Price after free usage limit is reached
Chirp 3: HD voices (sku:F977-2280-6F1B)	0 to 1 million characters	US\$0.00003 per character (US\$30 per 1 million characters)
Instant custom voice (sku:A247-37D7-Co94)	Not available	US\$0.00006 per character (US\$60 per 1 million characters)

Legacy TTS models

Model	Free usage limit	Price after free usage limit is reached
WaveNet voices (sku:9D01-5995-B545)	0 to 4 million characters	US\$0.000004 per character (US\$4per 1 million characters)
Studio voices (sku:84AB-48Co-F9C3)	0 to 1 million characters	US\$0.00016 per character (US\$160 per 1 million characters)
Standard voices (sku:9D01-5995-B545)	0 to 4 million characters	US\$0.000004 per character (US\$4 per 1 million characters)
Neural2 voices (sku:FEBD-04B6-769B)	0 to 1 million characters	US\$0.000016 per character (US\$16 per 1 million characters)
Polyglot (Preview) voices (sku:FEBD-04B6-769B)	0 to 1 million characters	US\$0.000016 per character (US\$16 per 1 million characters)

Note: For WaveNet and Standard voices, the number of characters will be equal to or less than the number of bytes represented by the text. This includes alphanumeric characters, punctuation, and white spaces. Some character sets use more than one byte for a character. For example, Japanese (ja-JP) characters in UTF-8 typically require more than one byte each. In this case, you are only charged for one character, not multiple bytes.
